

Declaration on the REACH regulation / RoHS directive

According to the EU regulation 1907/2006/EG (REACH) our laser and engraving materials are classified as articles and therefore are not subject to registration.

Therefore, the preparation of a safety data sheet is also not mandatory for our products. Technical data sheets will be sent upon customers request only.

Additional our laser and engraving materials fulfil the requirements of article 67 (REACH) and comply with the conditions of the restrictions listed in Annex XVII.

We use only such raw materials and substances for the production, which according to the information of our suppliers are not subject to authorization requirement as of Annex XIV of the REACH regulation. Also, no substances on the Candidate list (Substances of Very High Concern) are included in our products in a concentration above 0.1 % weight by weight.

If either by modification or reclassification of raw materials the duty to pass information about substances in articles (REACH / article 33; >0,1% weight by weight substances to which authorisation will apply) will be required, we will inform you immediately.

According to the information of our raw material suppliers, our laser and engraving materials also comply with the requirements of EU Directive No. 2011/65/EU (RoHS-2) and its extensions No. 2015/863 (RoHS-3), (EU) 2017/2102 including the application of RoHS exceptions concerning use of certain hazardous substances in electrical and electronic devices.
